

Al Kharj Air Base

A&E Design of a Military Air Base

Client

Ministry of Defense and Aviation

Project

Al Kharj Air Base

Location

Kingdom of Saudi Arabia

Project Period

Start January 1986

End October 1986

Project Description

This project involved the construction of a massive US\$ 15 Billion military base, fully functioning as a city for 70,000 people. Trans-Asia designed five (5) separate military airfields, freight, civilian passenger and Royal Saudi Air Force Academy training flights. Additional structures included the shopping malls of 753,000 square feet, 125 different building types including a sports stadium. The new community and airfield facilities cover 202 square miles.

Scope of Services

Trans-Asia provided the detailed architectural and engineering design for these military facilities.
