

Mandarin Oriental Manila Hotel

Detailed Engineering Design of a Hotel Building

**Client**

Jardine-Davies, Inc.

Project

Mandarin Oriental Manila Hotel

Location

Makati City, Philippines

Project Period

Start April 1975

End June 1976

Project Description

This Project is a 19-storey five-star hotel located in the Makati business area. This modern hotel consists of 473 rooms, five convention venues, health and recreation facilities, five restaurants, business center and a ballroom capable of accommodating up to 1,000 persons equipped with permanent stage, special track lighting and audio-visual equipment. Built at a cost of \$15.0 million, the hotel encompasses approximately 462,000 square feet of floor space. Leandro V. Locsin & Partners, Architects provided all architectural design.

Scope of Services

Trans-Asia provided all engineering design services including soil investigation for this project.
