## *Manila Hotel Tower*

Detailed Engineering Design of a Hotel Building

**Client**

Government Securities & Insurance System

**Project**

Manila Hotel Tower

**Location**

Manila, Philippines

**Project Period**

Start November 1982

End March 1983

### **Project Description**

The Project consists of the new Tower Building Extension and the rehabilitation of the original six-storey structure of this historic five-star hotel located in the Manila Bay area. Completion of the 18-storey Tower building Extension and rehabilitation of the original structure at a cost of approximately \$37.5 million provided this landmark hotel with 570 guest room and suites, 13 convention rooms, numerous restaurants and other amenities situated in 98,000 square feet of floor space. Leandro V. Locsin & Partners was commissioned to provide all architectural design.

### **Scope of Services**

Trans-Asia provided geotechnical investigations and engineering design services.
