

Manila Peninsula Renovation

Detailed Engineering Design for Renovation Works of a Hotel Building

Client

Hongkong and Shanghai Hotels Ltd.

Project

Manila Peninsula Renovation

Location

Makati City, Philippines

Project Period

Start November 1993

End December 1996

Project Description

The Project involved the renovation of the existing Manila Peninsula Hotel, a five-star hotel with 530 rooms, located in the heart of Makati's Commercial Center. The renovation includes the addition of the conservatory area and enlarging of the rooms in the Ayala and Makati Towers. Major renovation works are undertaken for the lobby, the ballroom, function rooms and water features.

Scope of Services

Trans-Asia was contracted to perform the complete mechanical, electrical and sanitary engineering designs and engineering support during construction. The design works involved the renovation and refurbishing of the air-conditioning and ventilation system, electrical high and low voltage systems, sanitary and plumbing systems, telecommunication system, water distribution system, fire protection system, building management and other building utility systems.
