

Automotive Assembly Plant Complex

Detailed Design and Construction Management of an Industrial Plant

Client

Chrysler Philippines Corporation

Project

Automotive Assembly Plant
Complex

Location

Cainta, Rizal
Philippines

Project Period

Start
End 1963

Project Description

The Chrysler Automotive Assembly Plant, one of the most modern industrial complexes in Asia was designed basically as a self-contained facility. This complex also included all supporting amenities such as cafeteria, offices, warehouses, washing facilities, storage, parking, security fencing and other support utility systems.

Scope of Services

Trans-Asia performed the complete architectural and engineering design, including topographical surveys and geotechnical investigations and analyses, as well as construction management for this automotive plant complex.
