

# TRANS-ASIA

## 11<sup>th</sup> Avenue Portion

### Construction Management of an Infrastructure Works

**Client**

Serendra. Inc.  
(an Ayala Company)

**Project**

11th Avenue Portion

**Location**

Fort Bonifacio Global City,  
Taguig City, Philippines

**Project Period**

Start     March 2005  
End       December 2006

**Project Description**

The project consists of the construction of the 11th Avenue Portion in phases and in accordance with the design and timetable for construction, which will meet the requirement of Serendra for the development of Lot B, and the installation of a storm drainage system underneath 11th Avenue.

**Scope of Work**

Trans-Asia renders technical advice, supervision and management services and general administration for the efficient implementation and completion of the project. TAPI manages the pre-construction, construction and post-construction stages of the project in manner satisfactory to Serendra, BCDA and FBDC. Trans-Asia also, coordinates with the general contractor, architect, design consultants, vendors and other person(s) involved in all the bid packages of the Project in order to expedite the completion of the project in accordance with the Owner's approved plans, specifications, schedule and budget.
