

## *Nestlé Administration Office Building*

Project / Construction Management of an Office Building

**Client**

Nestlé Philippines Inc.

**Project**

Nestlé Administrative Office Building

**Location**

Makati City, Philippines

**Project Period**

Start February 1997

End January 1999

### **Project Description**

The project is a 14-storey reinforced concrete office building with six (6) basement levels and having a total gross area of approximately 26,487 square meters. The building is designed utilizing the latest technology. It is equipped with a one hundred percent (100%) back-up power generation system and four(4) high speed zoned elevators, two (2) shuttle lifts and one (1) service elevator. The exterior facade is furnished with glass curtain walls and stone cladding.

### **Scope of Service**

Trans-Asia was selected to perform the Project Management, Construction Management and Quantity Surveying Services for this office building.
