Skyplaza Project

Detailed Engineering Design of an Office Building

Client
Kajima Resources Development

Project
Skyplaza Project

Location
Makati City
Philippines

Project Period
Start October 1996
End November 1999

Project Description

The Project is a medium rise reinforced concrete building structure, having a 22-storey level commercial/office floor area and a five (5) level basement parking area. It is located at No.6788 Ayala Avenue, City of Makati.

Scope of Service

Trans-Asia worked with Kajima Resources Development Corporation, serving as their local consultant that had undertaken the Detailed Architectural and Structural Engineering Design Services as well as its subsequent CAD Works of the building.
