## *Makar Wharf*

Environmental and Feasibility Studies of Wharf

**Client**

United States Agency for  
International Development

**Project**

Makar Wharf

**Location**

General Santos  
Philippines

**Project Period**

Start January 1990  
End October 1991

**Project Description**

Improvement works for the Port of General Santos City, South Cotabato (Makar Wharf) include construction of a new 24-meter by 12-meter extension on the south end of the existing wharf; construction of a 9-meter by 11-meter RO-RO ramp; construction of reinforced concrete platform; demolition of existing reinforced concrete curb and removal of timber walling. It is anticipated that the existence of an improved infrastructure will accelerate private sector investments in "value-added" processing of indigenous products.

**Scope of Service**

Trans-Asia provided feasibility study and environmental assessment services.
